## 1. Introduction

Welcome to **go2FA User Manual**. The objective of this document is to allow user to understand the functionalities of go2FA application for both on PC and on Android mobile.

## 2. Requirements

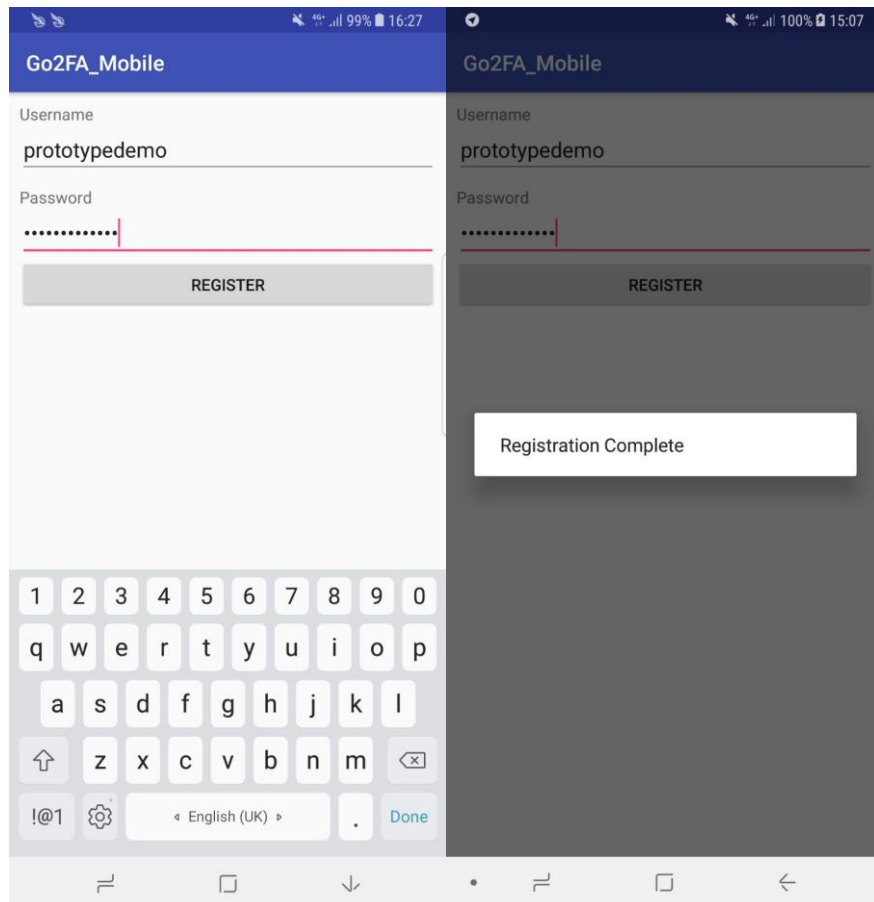

Recommended System Requirements	
	Android
Connectivity	Wi-Fi 802.11 a/b/g/n/ac), Internet Connection(3G/4G)
Operating System	Android Version 6.0 (Marshmallow) and above
RAM	1GB

### 3. Register Account

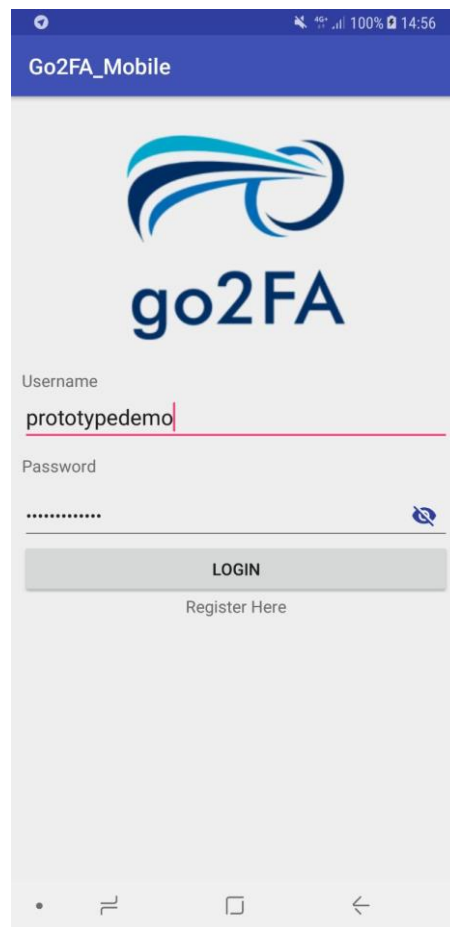

The screenshot displays the 'Go2FA\_Mobile' application interface for account registration. At the top, a blue header bar contains the app name. Below this, there are two input fields: 'Username' and 'Password', each with a red underline. A grey button labeled 'REGISTER' is positioned below the password field. The bottom of the screen shows a standard Android navigation bar with icons for back, home, and recent apps.

This is the Register Account page for Android Mobile Application.

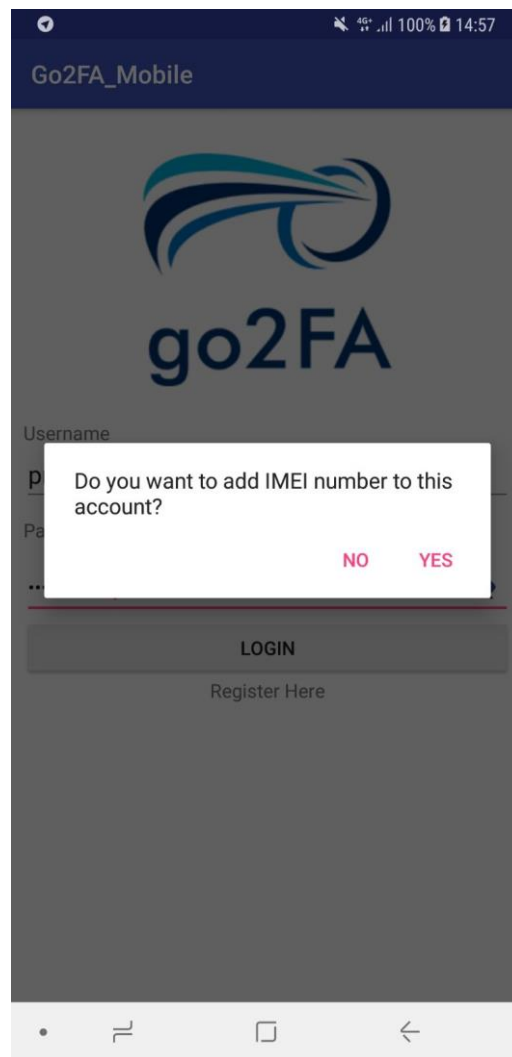

Upon entering the desire Username and Password for account registration, a prompt will appear indicating that the account has been created successful.

## 4. Log In

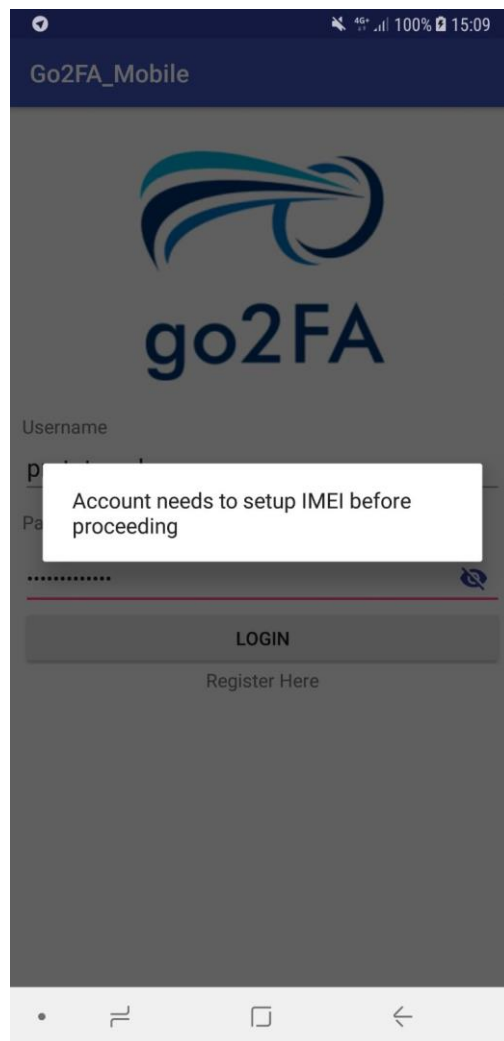

This is the log in page when the application is launch, simply key in the Username and Password that has been created to use our system.

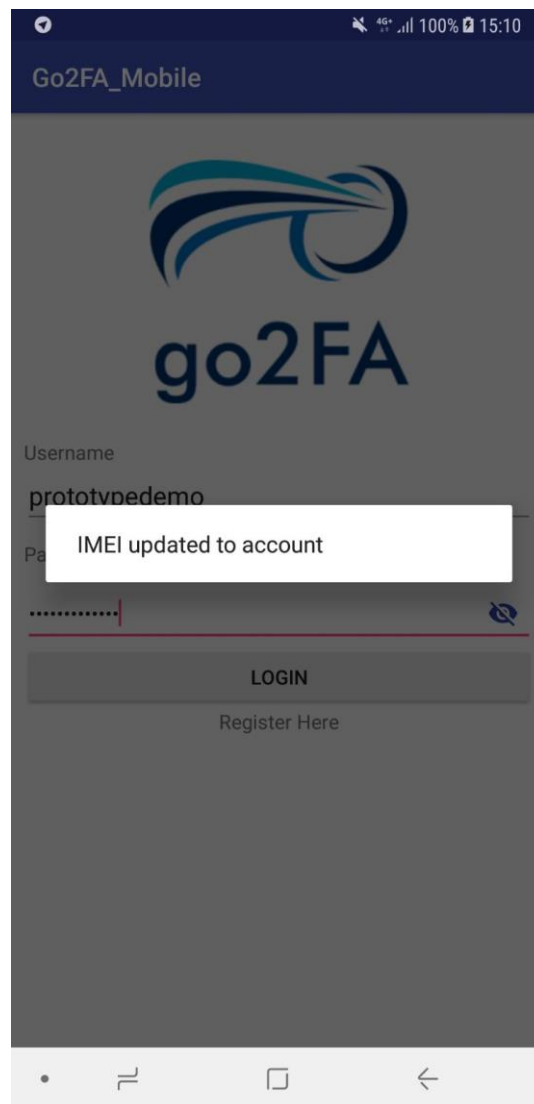

When successful logged in, system will prompt a message indicating if you would like to register your account to this mobile device, this is to help us and yourself to secure this account and to tag it under the mobile device (IMEI number) that you will be using at the current moment.

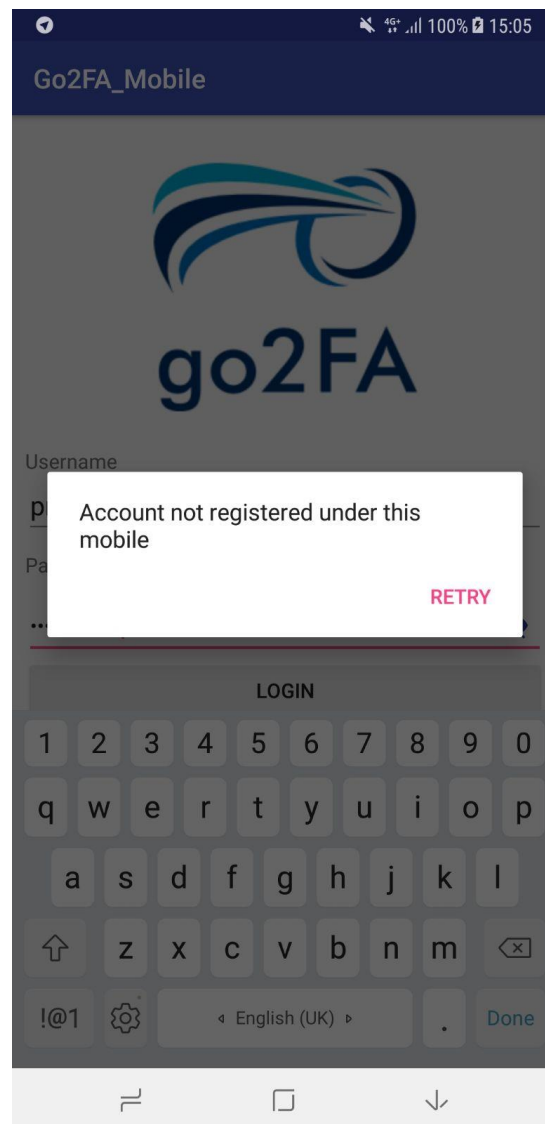

If the choice you selected is NO, you will not be able to proceed to main menu.

If the choice you selected is YES, your IMEI number will be tagged to your account and updated in our database.

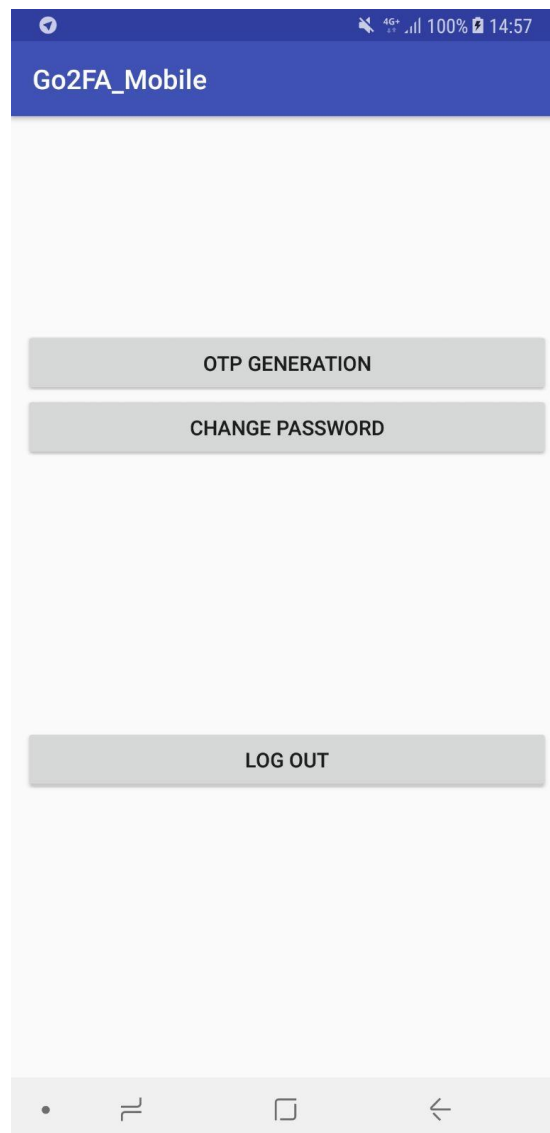

You will then be proceeded to the main menu

Note that if your account is tagged to a mobile device, your account cannot be used on another mobile device that isn't registered as one account can only be tagged to one mobile device.

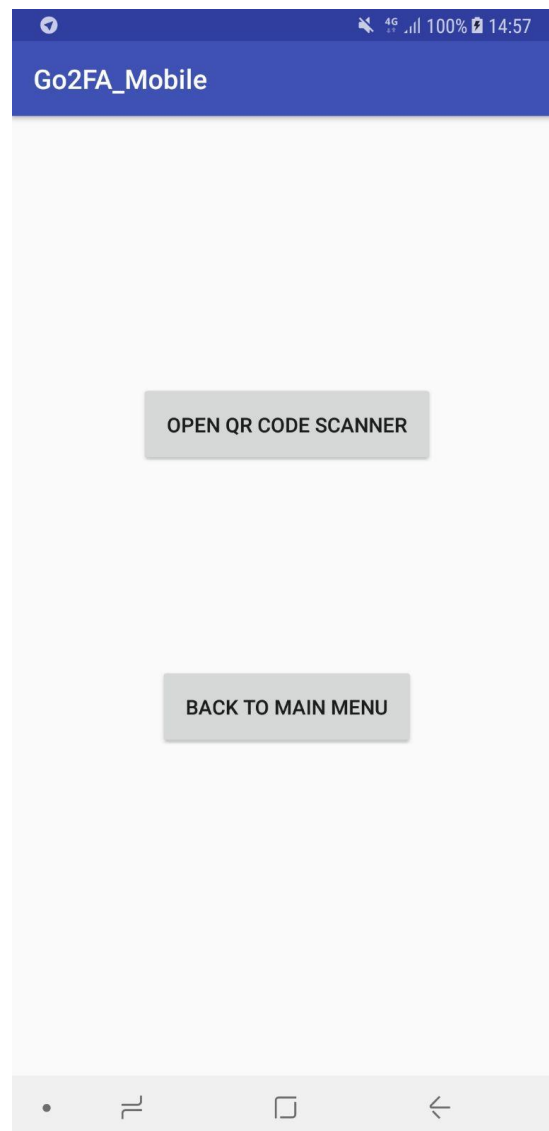

A message will be prompted if you are using your account on a mobile device that is not tagged under your account details and you will not be logged in.

## 5. Main Menu

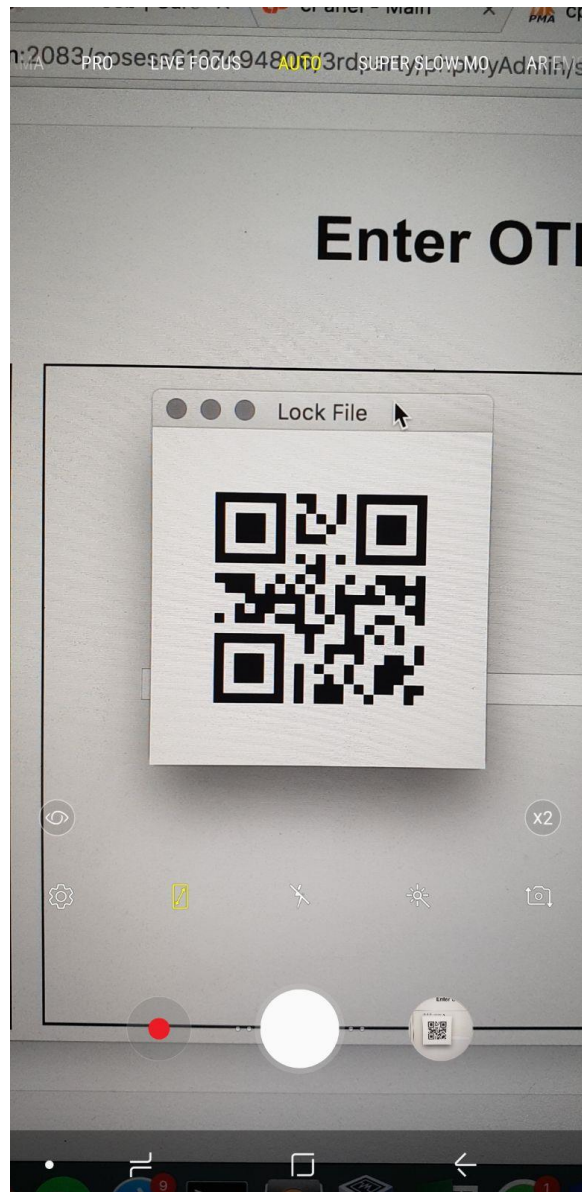

After logging in, welcome to our application's main menu. This is where you can select the OTP generation function provided by our application to help protect your files on your computer.

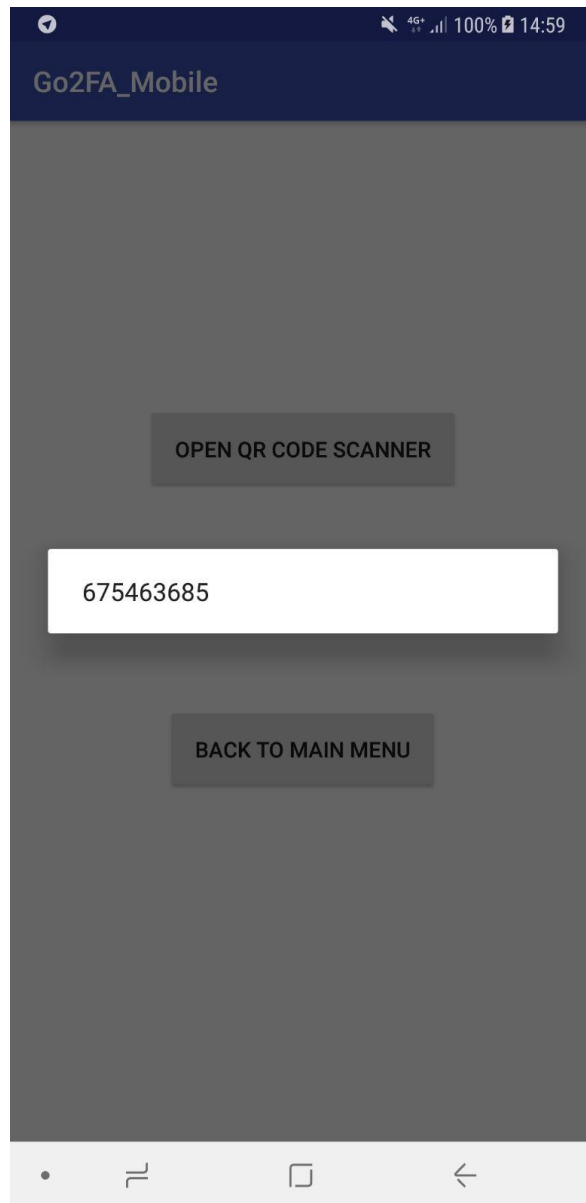

## 5.1. OTP Generation

This page will appear when you select our OTP GENERATION function. This page lets you open the QR CODE SCANNER to help in generating OTP by scanning the QR CODE appeared when you are locking a file on your computer.

Upon selecting the OTP GENERATION function, the scanner will be open, and you can use it to scan the QR Code which appeared on your computer screen.

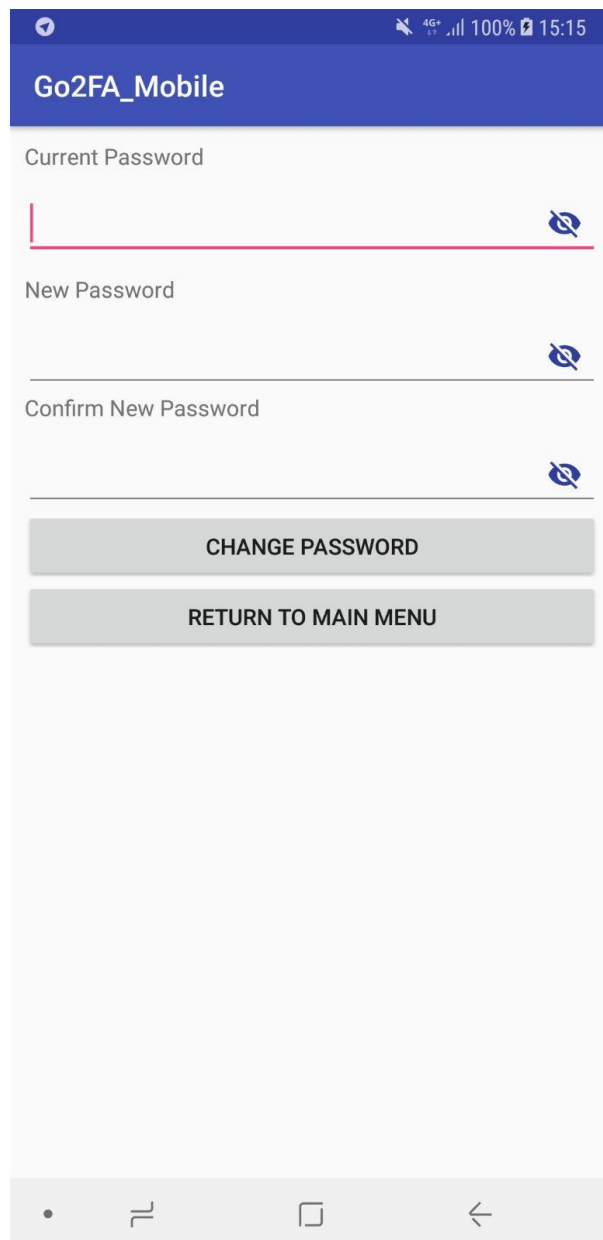

The scanner will decrypt the QR Code and OTP will be generated.

The OTP in the QRCode is cryptographically secured and can only be decrypted using our mobile application scanner.

\

## 5.2. Change Password

Go2FA\_Mobile

Current Password

New Password

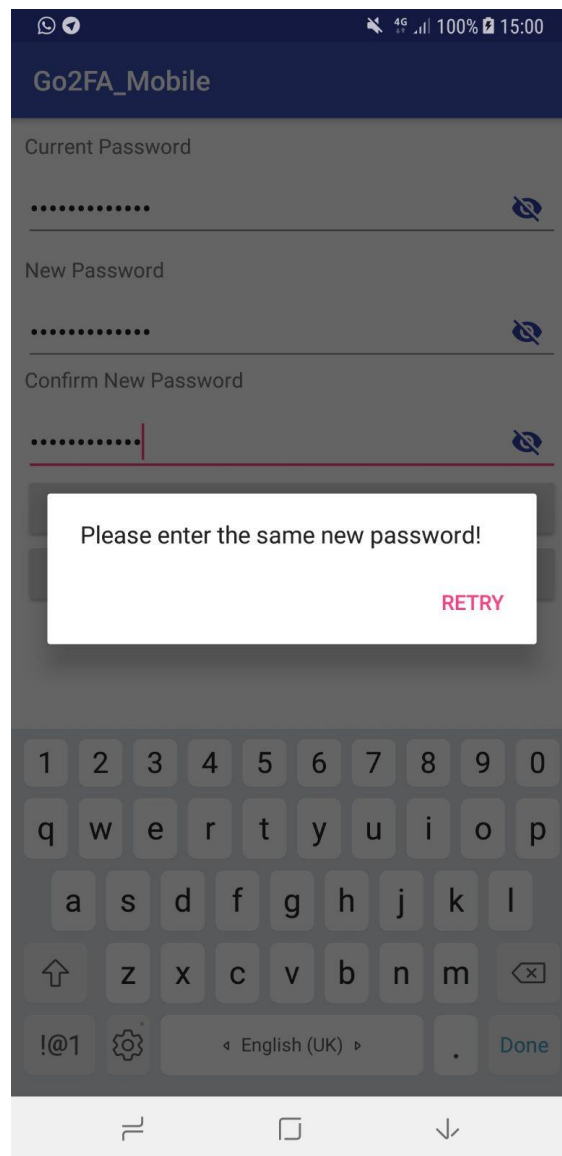

Confirm New Password

CHANGE PASSWORD

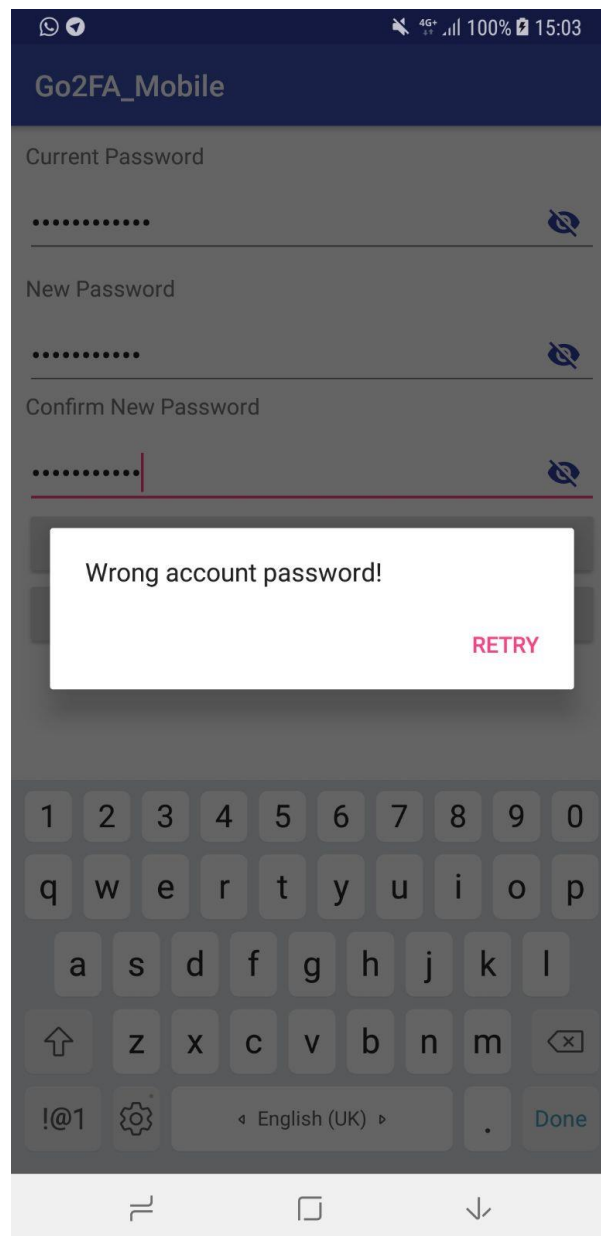

RETURN TO MAIN MENU

This page will appear when you select our CHANGE PASSWORD function. This page lets you change your existing password to a new desired password.

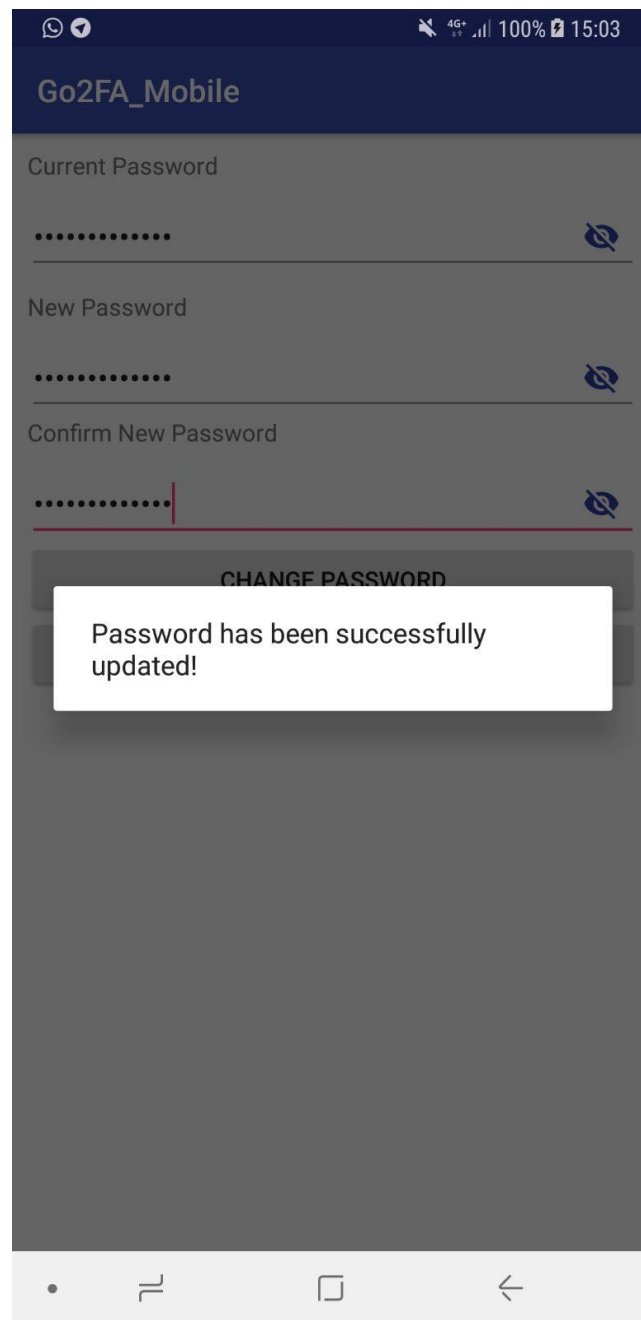

If the password you entered for the new password and confirm password does not match, a prompt message will appear indicating the mismatch and your password will not be changed.

If the password you entered for the current password does not match with the record on our database, a prompt message will appear indicating the mismatch and your password will not be changed.

When you entered the password credentials correctly, your password will be successfully changed and updated in our database.
